Section	Page
1 Introduction to the International Space Station.....	1-1
1.1 Purpose, Objectives, and Organization of the ISS.....	1-1
1.2 ISS Elements	1-5
1.2.1 Functional Cargo Block.....	1-7
1.2.2 Node	1-7
1.2.3 Service Module	1-7
1.2.4 Soyuz	1-7
1.2.5 Laboratory.....	1-7
1.2.6 Mini-Pressurized Logistics Module.....	1-8
1.2.7 Joint Airlock.....	1-8
1.2.8 Interim Control Module.....	1-8
1.2.9 Docking Compartment	1-8
1.2.10 Truss	1-8
1.2.11 Science Power Platform.....	1-8
1.2.12 Universal Docking Module	1-8
1.2.13 Japanese Experiment Module	1-9
1.2.14 Docking and Stowage Module	1-9
1.2.15 Cupola	1-9
1.2.16 Research Module.....	1-9
1.2.17 Columbus Orbital Facility, Also Known as the Attached Pressurized Module	1-9
1.2.18 Life Support Module.....	1-9
1.2.19 Crew Rescue Vehicle, Also Known as the Crew Transfer Vehicle..	1-9
1.2.20 Centrifuge Accommodations Module	1-9
1.2.21 Habitation Module	1-10
1.2.22 Logistics Vehicles	1-10
1.3 Operations Concepts	1-10
1.4 Traffic Model	1-11
1.5 Life During an Expedition.....	1-13
1.5.1 Progress Docking.....	1-14
1.5.2 Reboost	1-14
1.5.3 Quiescent Operations	1-15
1.5.4 Shuttle Docking/Mated Operations	1-15
1.5.5 Crew Handover	1-15
1.5.6 Deferred Assembly	1-16
1.6 Summary.....	1-16
2 Command and Data Handling Overview	2-1
2.1 Introduction	2-1
2.2 Objectives	2-2
2.3 Station Level Control Software (Modes)	2-3

---------	------

Section	Page
2.4 Crew Interface Computers	2-5
2.5 Caution and Warning	2-7
2.5.1 C&W Function and Classes	2-7
2.5.2 C&W Indications	2-7
2.5.3 C&W Exchange Between Partner Modules and the Orbiter	2-12
2.5.4 Caution and Warning Assembly.....	2-12
2.6 Processing Computers and Data Buses	2-12
2.6.1 U.S. Command and Data Handling System.....	2-12
2.6.2 Russian Computer System	2-27
2.6.3 Japanese Computer System - TBD	2-31
2.6.4 European Computer System - TBD	2-31
2.7 Multisegment Data Exchange	2-31
2.8 Summary.....	2-32
3 Electrical Power System Overview	3-1
3.1 Introduction	3-1
3.2 Objectives	3-1
3.3 USOS EPS Functional Design	3-1
3.4 USOS EPS Architecture	3-4
3.4.1 Primary Power System.....	3-5
3.4.2 Secondary Power System.....	3-9
3.4.3 Support Systems.....	3-11
3.4.4 USOS EPS Redundancy and System Protection	3-13
3.5 USOS EPS Interfaces.....	3-14
3.5.1 Power Interfaces	3-14
3.5.2 Systems Interfaces	3-14
3.6 Comparison between USOS and ROS EPS	3-15
3.7 Summary.....	3-16
4 Communication and Tracking Overview	4-1
4.1 Introduction	4-1
4.2 Objectives	4-1
4.3 Purpose	4-1
4.4 Overview	4-2
4.4.1 ISS Commanding.....	4-3
4.5 Internal Audio Subsystem	4-5
4.5.1 IAS Purpose.....	4-5
4.5.2 IAS Operations and Components	4-5
4.5.3 Russian Audio.....	4-8
4.6 S-Band Subsystem	4-9
4.6.1 Purpose	4-9
4.6.2 S-Band Components and Operations	4-10
4.6.3 Software.....	4-12
4.6.4 Comparable Russian Segment Communication Systems	4-12

4.7	Ultrahigh Frequency Subsystem	4-13
4.7.1	Purpose	4-14
4.7.2	Ultrahigh Frequency Subsystem Operations and Components	4-14
4.7.3	UHF Software	4-16
4.7.4	Comparable Russian Segment Communication Systems	4-16
4.8	Video Distribution Subsystem	4-16
4.8.1	Video Distribution Subsystem Purpose.....	4-17
4.8.2	Video Distribution System Operations and Components	4-17
4.8.3	Russian Equivalent	4-20
4.9	Ku-Band Subsystem	4-21
4.9.1	Purpose	4-22
4.9.2	Operations and Components	4-22
4.9.3	Russian Equivalent	4-24
4.10	Summary.....	4-25
5	Thermal Control System Overview	5-1
5.1	Introduction	5-1
5.2	Objectives	5-1
5.3	TCS Architecture.....	5-1
5.4	USOS Passive Thermal Control System.....	5-2
5.4.1	Purpose	5-2
5.4.2	USOS PTCS Components.....	5-2
5.5	USOS Active Thermal Control System	5-5
5.5.1	Purpose	5-6
5.6	Lab Internal Thermal Control System	5-6
5.6.1	Purpose	5-6
5.6.2	Lab ITCS Components	5-7
5.6.3	Lab ITCS Interfaces	5-9
5.7	USOS Early External Thermal Control System.....	5-9
5.7.1	Purpose	5-9
5.7.2	USOS EETCS Components	5-11
5.7.3	USOS EETCS Interfaces	5-12
5.7.4	USOS External Thermal Control System.....	5-13
5.8	USOS TCS Software	5-13
5.8.1	Purpose	5-13
5.8.2	Architecture.....	5-14
5.9	ROS Thermal Control System	5-15
5.9.1	Purpose	5-15
5.9.2	FGB TCS Subsystems.....	5-15
5.9.3	Comparison of USOS and ROS TCS	5-18
5.10	Flight-by-Flight Operations.....	5-19
5.11	TCS Summary	5-20
Section		Page
5.11.1	USOS PTCS Summary.....	5-20
5.11.2	USOS ATCS Summary.....	5-20

5.11.3	Lab ITCS Summary	5-21
5.11.4	USOS EETCS Summary	5-21
5.11.5	USOS TCS Software Summary	5-21
5.11.6	ROS TCS Summary.....	5-21
6	Environmental Control and Life Support System Overview.....	6-1
6.1	Introduction	6-1
6.2	Objectives	6-1
6.3	ECLSS Overview	6-1
6.3.1	Atmosphere Control and Supply	6-2
6.3.2	Atmosphere Revitalization	6-4
6.3.3	Temperature and Humidity Control.....	6-6
6.3.4	Fire Detection and Suppression.....	6-8
6.3.5	Water Recovery and Management	6-9
6.4	ECLSS Interfaces	6-12
6.5	ECLSS Milestones.....	6-12
6.5.1	Flight 1A/R - Functional Cargo Block.....	6-12
6.5.2	Flight 2A - Node 1	6-13
6.5.3	Flight 1R - Service Module.....	6-13
6.5.4	Flight 5A - Lab.....	6-13
6.5.5	Flight 7A - Airlock.....	6-13
6.6	Summary.....	6-13
6.6.1	ECLSS Purpose and Functions	6-13
6.6.2	Subsystem Names and Functions	6-13
6.6.3	Milestones.....	6-14
7	Guidance, Navigation, and Control Overview.....	7-1
7.1	Introduction	7-1
7.2	Objectives	7-2
7.3	U.S. Guidance, Navigation, and Control System Description	7-2
7.3.1	Guidance	7-2
7.3.2	Navigation.....	7-3
7.3.3	Station Control	7-6
7.3.4	Attitude Regimes and Operational Impacts	7-8
7.3.5	GNC Software Operational Modes	7-10
7.3.6	GNC Capability Buildup	7-11
7.4	System Interfaces	7-14
7.4.1	Command and Data Handling.....	7-14
7.4.2	Electrical Power System Interfaces.....	7-15
7.4.3	Thermal Control System	7-16
7.4.4	Station Robotics Interface.....	7-16
Section		Page
7.4.5	Communications and Tracking	7-16
7.4.6	Environmental Control and Life Support System	7-17
7.5	Summary.....	7-17

8	Payloads Overview.....	8-1
8.1	Introduction	8-1
8.2	Objectives	8-1
8.3	ISS Utilization.....	8-1
8.4	ISS Types of Research	8-1
8.4.1	Life Science	8-2
8.4.2	Microgravity Sciences	8-2
8.4.3	Space Sciences	8-2
8.4.4	Earth Sciences.....	8-3
8.4.5	Commercial Product Development	8-3
8.4.6	Engineering Research and Technology	8-3
8.5	ISS Payloads Components	8-4
8.5.1	U.S. Laboratory.....	8-4
8.5.2	International Standard Payload Rack	8-6
8.5.3	Facility Class Payloads	8-7
8.5.4	EXpedite the PRocessing of Experiments to Space Station	8-8
8.5.5	Active Rack Isolation System.....	8-9
8.5.6	Laboratory Support Equipment	8-10
8.5.7	Window Observation Research Facility	8-11
8.5.8	Attached Payloads	8-12
8.5.9	Centrifuge Accommodation Module.....	8-13
8.5.10	Japanese Experiment Module	8-14
8.5.11	Columbus Orbital Facility	8-15
8.5.12	Russian Research Modules	8-16
8.6	Summary.....	8-16
9	Robotics Systems Overview	9-1
9.1	Introduction	9-1
9.2	Objectives	9-1
9.3	Overview	9-1
9.4	Robotics Systems on the ISS	9-2
9.4.1	Mobile Servicing System.....	9-2
9.4.2	European Robotic Arm.....	9-12
9.4.3	Japanese Experiment Module Remote Manipulator System	9-14
9.5	System Relationships	9-17
9.6	Summary.....	9-18
10	Extravehicular Activity Overview.....	10-1
10.1	Introduction	10-1
10.1.1	People Involved in EVA	10-1
Section		Page
10.1.2	Types of EVAs	10-1
10.2	Objectives	10-2
10.3	Comparison of Spacesuits.....	10-3
10.3.1	Extravehicular Mobility Unit.....	10-3
10.3.2	The Orlan-M.....	10-4

10.3.3	EMU vs. Orlan.....	10-5
10.4	ISS Joint Airlock.....	10-7
10.4.1	Components of the Joint Airlock	10-8
10.4.2	ISS Joint Airlock System Interfaces	10-11
10.5	EVA Operations	10-13
10.5.1	Prep/Post Activities	10-13
10.5.2	Decompression Sickness Prevention.....	10-14
10.6	EVA Tools and Restraints.....	10-15
10.6.1	Mini-Workstation	10-15
10.6.2	Multi-Use Tether	10-16
10.6.3	Portable Work Platform.....	10-17
10.6.4	Crew and Equipment Translation Aid Cart.....	10-21
10.6.5	ORU Transfer Device (Crane).....	10-22
10.6.6	Pistol Grip Tool (Power Tool).....	10-23
10.6.7	Tool Box.....	10-24
10.7	Summary.....	10-25
11	Structures and Mechanisms Overview.....	11-1
11.1	Introduction	11-1
11.2	Objectives	11-1
11.3	Structures.....	11-1
11.3.1	Pressurized Elements	11-1
11.3.2	Truss Assemblies.....	11-4
11.4	Mechanisms.....	11-8
11.4.1	Common Berthing Mechanism/Manual Berthing Mechanism	11-8
11.4.2	Lab Cradle Assembly.....	11-9
11.4.3	Segment to Segment Attach System/Rocketdyne Truss Attach System	11-10
11.4.4	Common Attach System	11-11
11.4.5	Androgynous Peripheral Attach System	11-12
11.4.6	Probe/Drogue Docking System/Hybrid Docking System.....	11-13
11.5	Summary.....	11-14
12	Flight Crew Systems Overview	12-1
12.1	Introduction	12-1
12.2	Objectives	12-2
12.3	Restraints and Mobility Aids.....	12-2
12.3.1	Purpose	12-2
12.3.2	Hardware Components	12-2
12.3.3	Russian Stowage	12-10
Section		Page
12.4	Stowage	12-10
12.4.1	Purpose	12-10
12.4.2	Hardware Components	12-10
12.4.3	Russian Stowage	12-12

Section		Page
12.5	Portable Emergency Provisions.....	12-12
12.5.1	Purpose	12-12
12.5.2	Hardware Components	12-12
12.5.3	Russian PEPs	12-13
12.6	Decals and Placards	12-13
12.6.1	Purpose	12-13
12.6.2	Hardware Components	12-14
12.7	Housekeeping and Trash Management.....	12-15
12.7.1	Purpose	12-15
12.7.2	Hardware Components	12-15
12.7.3	Russian Housekeeping Supplies	12-16
12.8	Closeouts.....	12-16
12.8.1	Purpose	12-16
12.8.2	Hardware Components	12-16
12.9	Lighting	12-17
12.9.1	Purpose	12-17
12.9.2	Hardware Components	12-17
12.10	Personal Hygiene.....	12-18
12.10.1	Purpose	12-18
12.10.2	Hardware Components	12-18
12.11	Operational and Personal Equipment.....	12-19
12.11.1	Purpose	12-19
12.11.2	Hardware Components	12-19
12.12	Wardroom and Galley and Food System.....	12-19
12.12.1	Purpose	12-19
12.12.2	Hardware Components	12-19
12.13	Crew Privacy Accommodations	12-20
12.13.1	Purpose	12-20
12.13.2	Hardware Components	12-20
12.14	Summary.....	12-20
13	On-Orbit Maintenance Overview.....	13-1
13.1	Introduction	13-1
13.2	Objectives	13-1
13.3	Maintenance Philosophy/Definitions	13-1
13.3.1	On-Orbit Maintenance Philosophy	13-2
13.3.2	Methods of On-Orbit Maintenance.....	13-3
13.3.3	Types of On-Orbit Maintenance.....	13-4
13.3.4	Levels of On-Orbit Maintenance	13-4
13.4	On-Orbit Maintenance Strategy	13-5
13.4.1	NASA MWA/IVA Tools.....	13-5
13.4.2	Maintenance Logistics	13-12
13.4.3	Maintenance Procedures	13-14
13.4.4	Maintenance Training	13-14

13.5	Summary.....	13-15
14	Crew Health Care System.....	14-1
14.1	Introduction	14-1
14.2	Objectives	14-1
14.3	Purpose	14-1
14.3.1	CHeCS Architecture.....	14-1
14.3.2	CHeCS Subsystems	14-1
14.4	Countermeasures System	14-2
14.4.1	Components	14-2
14.5	Environmental Health System.....	14-5
14.5.1	Components	14-5
14.6	Health Maintenance System.....	14-13
14.6.1	Components	14-13
14.7	Summary.....	14-18
14.8	CHeCS Launch Summary.....	14-19
15	Operations and Planning Overview.....	15-1
15.1	Introduction	15-1
15.2	Objectives	15-1
15.3	Introduction to Planning Time Frames and Products.....	15-1
15.3.1	ISS Planning Time Frames	15-1
15.3.2	Complexity of the Planning Process	15-2
15.3.3	Increment Planning Process Template	15-2
15.3.4	Strategic Planning.....	15-3
15.3.5	Tactical Planning.....	15-4
15.3.6	Increment Planning	15-5
15.3.7	Increment Execution	15-7
15.4	Planning and Analysis Tools	15-9
15.4.1	The Integrated Planning System.....	15-9
15.5	Inventory Management	15-10
15.6	Summary.....	15-11

Appendices

Appendix	Page
A Acronyms	A-1
B Answers	B-1
C ISS Reference Frames	C-1

TABLES

Table	Page
1-1 Training phases	1-1
2-1 Station Modes.....	2-3
2-2 Crew interface computers at 8A	2-5
2-3 Caution and warning classes	2-7
2-4 Key terms from MIL STD 1553B protocol	2-22
3-1 USOS EPS components at flight 8A	3-18
4-1 Internal audio subsystem assembly sequence.....	4-9
4-2 S-band assembly.....	4-13
4-3 UHF subsystem	4-16
4-4 Video distribution subsystem assembly sequence.....	4-21
4-5 Ku-band Subsystem assembly sequence	4-25
5-1 Typical surface finish properties	5-4
5-2 EETCS/ETCS comparison	5-13
5-3 TCS comparison.....	5-18
5-4 TCS buildup	5-19
9-1 Overview of ISS Robotics Systems.....	9-17
9-2 Summary of Robotics Systems and Subsystems	9-18
10-1 EVA flight rules	10-1
10-2 EMU and Orlan-M comparison.....	10-5
10-3 Prep/Post EVA Procedures.....	10-13
11-1 Mechanisms and their functions.....	11-14
13-1 On-orbit maintenance levels.....	13-5
14-1 Volatile organic analyzer target compounds	14-12

FIGURES

Figure	Page

12-3	Seat track details.....	12-4
12-4	Seat track button.....	12-4
12-5	Node FWD endocone/alcove area.....	12-5
12-6	STEA attached to seat track	12-5
12-7	Handrail equipment anchor	12-6
12-8	HEA attached to handrail	12-6

Figure	Page
12-9 Long duration foot restraint.....	12-7
12-10 SDFR attached to handrails.....	12-8
12-11 Handrails	12-9
12-12 Rack handle assembly	12-9
12-13 Restraints and mobility aids use.....	12-10
12-14 Stowage rack	12-11
12-15 Portable emergency provisions.....	12-13
12-16 Stowage tray card	12-14
12-17 Hatch decal.....	12-14
12-18 Wet/dry vacuum cleaner.....	12-15
12-19 Close panels (typical)	12-17
12-20 General luminaire assembly	12-18
13-1 Maintenance work area (top view).....	13-6
13-2 MWA containment system.....	13-7
13-3 Scopemeter.....	13-9
13-4 Logic analyzer	13-10
13-5 Function/sweep generator.....	13-10
13-6 Diagnostic caddy	13-11
13-7 DC power supply.....	13-11
13-8 Power strip.....	13-12
14-1 Treadmill with vibration isolation system.....	14-3
14-2 Heart rate monitor	14-4
14-3 Space shuttle cycle ergometer	14-5
14-4 Total organic carbon analyzer	14-6
14-5 Water microbiology kit	14-7
14-6 WMK syringe assembly	14-7
14-7 Surface sampler kit.....	14-8
14-8 Microbial air sampler	14-8
14-9 Tissue equivalent proportional counter	14-9
14-10 Intravehicular-charged particle directional spectrometer	14-10
14-11 Extravehicular-charged particle directional spectrometer	14-10
14-12 Compound-specific analyzer - combustion products	14-11
14-13 CSA-CP with pump.....	14-12
14-14 Compound-specific analyzer - hydrazine	14-13
14-15 Ambulatory medical pack	14-14
14-16 Crew contaminant protection kit	14-15
14-17 Advanced life support pack.....	14-16
14-18 Crew medical restraint system	14-16
14-19 Defibrillator.....	14-17
14-20 Respiratory support pack.....	14-17
15-1 Planning process template	15-3
15-2 JOPA timeframe	15-5
15-3 Weekly STP development.....	15-8
15-4 Releationship between the OOS, STP, and OSTP	15-9
